Background

Officially launched over 2 years ago, initially targetting the hispanic market in Toronto, we have since then grown into the mainstream market and offer a unique "spanglish" experience for hispanophiles across the GTA. We receive well over 50K visitor hits/month.

Target Market: Information Only - Not a Booking Agent

The website is a marketplace and most agents participate from both retail and wholesale environments. We are not targetting the "price" conscience clients but also clients who are seeking a unique adventure, as from time to time we receive access to unique tours. We target all consumers from all revenue and demographic backgrounds. Picture a virtual mall. Some stores are expensive, some are not. Some focus on specific items, some do not. Contact us today and find out how we can assist your needs.
